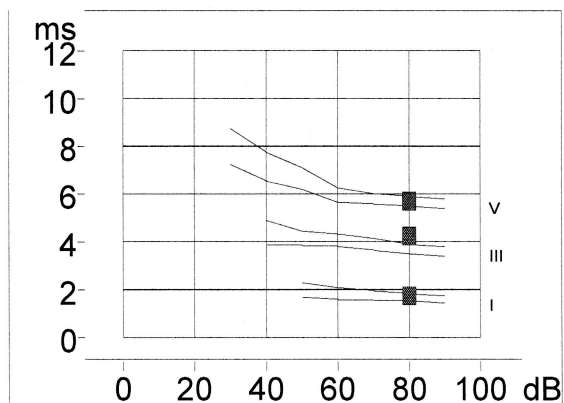

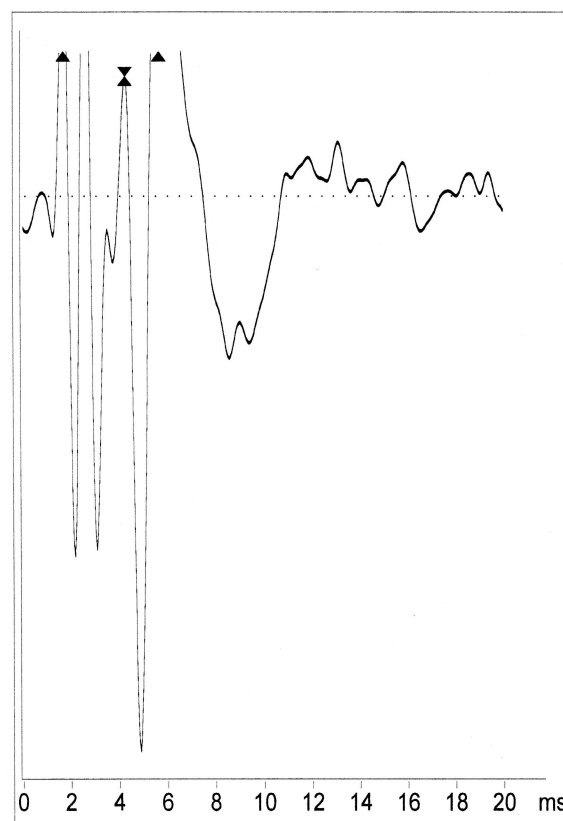

Figure 1 is a line graph showing the relationship between the time delay of the first peak (ms) and the frequency of the first peak (dB) for three different conditions: V, III, and I. The y-axis represents time delay in ms, ranging from 0 to 12. The x-axis represents frequency in dB, ranging from 0 to 100. Three data series are plotted: V (top), III (middle), and I (bottom). Each series shows a decreasing trend in time delay as frequency increases. Data points are marked with black squares at 80 dB.

Frequency (dB)	Time Delay (ms) - V	Time Delay (ms) - III	Time Delay (ms) - I
30	8.5	5.0	2.5
40	7.5	4.5	2.2
60	6.0	4.0	2.0
80	5.5	4.2	1.8
